

BLU ANDREI R. CHUMBINGCO

Software Engineer | Application Developer | .NET Developer

Pasig City, Philippines | +63 961 320 4074 | blu.chumbingco@gmail.com

PROFESSIONAL SUMMARY

Software Engineer and Application Developer with 3+ years of experience building web, desktop, API, and middleware solutions for financial services and land registration environments. Skilled in C#, .NET Framework, .NET Core, ASP.NET, React.js, SQL, Sybase, REST/SOAP APIs, data migration, third-party integrations, performance optimization, multi-threaded processing, testing, documentation, and Agile/Scrum delivery.

CORE SKILLS

Languages / Frameworks	C#, .NET Framework, .NET Core, ASP.NET, React.js, JavaScript, HTML, CSS, Bootstrap, Tailwind, Flutter
Databases	MS SQL Server, MySQL, Sybase, Transact-SQL, database migration, data extraction, synchronization
APIs / Integration	RESTful APIs, SOAP APIs, third-party API integration, API adapters, middleware applications
Tools / Platforms	GitLab, GitHub, Visual Studio, Visual Studio Code, AWS Cloud Services, Tableau, Hangfire, Microsoft Office
Methods	Agile, Scrum, Waterfall, sprint planning, daily stand-ups, retrospectives, testing, debugging, release notes, deployment support

PROFESSIONAL EXPERIENCE

Application Developer | Land Registration Systems, Inc. Jul 2024 - Mar 2026

- Developed and maintained web and middleware applications supporting land registration processes.
- Optimized application performance by analyzing system bottlenecks and implementing targeted solutions.
- Implemented multi-threaded processing in existing applications to improve background processing and application throughput.
- Built and supported data migration and synchronization components across database platforms.
- Created effort estimations, technical specifications, release notes, testing documentation, and deployment support across multiple environments.
- Participated in Agile development cycles, including sprint planning, daily stand-ups, and retrospectives.

Software Engineer | Network Capital Ventures Inc. Aug 2022 - Jun 2024

- Developed scalable, maintainable code for financial applications supporting pawn-broking, remittance, insurance, bills payment, remit-to-account, corporate payout, collections, and e-loading services.
- Integrated third-party APIs and supported API components for business partner connectivity.
- Used Git-based version control and Agile practices to collaborate with teams and deliver software updates.
- Assisted in testing, debugging, documenting, and maintaining software applications for production use.

SELECTED PROJECTS

EIS - Executive Information System: Web portal, API, and middleware platform for executive reporting, internal data display, data migration, and data synchronization across database platforms. Technologies: .NET 4-8, React.js, Hangfire, Tailwind, Tableau, Sybase, SQL.

API Adapter: API manager for third-party business partner integrations with centralized logging and internal application connectivity. Technologies: .NET 4, SQL.

IClick 3.0 / eCebuana: Financial applications for pawning, domestic and international remittance, micro-savings, bills payment, prepaid e-loading, micro-insurance, and mobile banking services. Technologies: .NET 4, SQL.

LIS - Legacy Application Support: Reverse-engineered legacy application behavior and built bypass fixes, migration tools, and synchronization tooling. Technologies: .NET 6, Sybase, SQL.

EDUCATION

Bachelor of Science in Information Technology, Pamantasan ng Lungsod ng Pasig 2018 - 2022

TECHVOC ICT - Computer Systems Servicing Strand, Jose Rizal University 2016 - 2018

CERTIFICATIONS AND TRAINING

- 55320AC: Programming with HTML, CSS & JavaScript
- 55339AC: Programming in C#
- 55352AC: SQL Database / Introduction to SQL Database
- DP-080T00AC: Querying Data with Microsoft Transact-SQL
- National Certificate II in Computer Systems Servicing
- Flutter Training (2022)
- Application Development Technologies - Microsoft Programming, NTT DATA (2022)
